

Employment Workshop

Purpose

To develop options that will encourage a vibrant and diversified local economy and provide for long-term sustainable economic growth.

Focus

- Policies that encourage and promote an increasingly diverse range of employment opportunities for the local community
- Opportunities for people to improve their workplace skills.

Considerations

The workshop shall address the following which West Berkshire Council and the Examiner may wish to see have been considered.

- Support for community enterprises and the voluntary sector?
- Support for the creation of flexible jobs to meet the changing needs of the population?

One way to increase employment opportunities is having an environment that is attractive to potential new enterprises. This provision overlaps with the work of the Community Services and Facilities' and the 'Land and Street Scapes' workshops.
